

PROSOCO

LONG-LASTING WATER REPELLENCY

Siloxane PD is designed to penetrate and protect porous materials without altering their natural appearance for 10+ years. It helps to prevent water infiltration and damage like cracking, spalling and staining. For use on brick, concrete tile, precast panels, pavers, cast-in-place concrete and stucco.

INVISIBLE

Contains no film-forming components like acrylics or pigments for enhancement

LASTING

Penetrates and reacts with the surface to form a chemical bond, providing long-term durability while maintaining the substrate's natural breathability

VERSATILE

Ready-to-use, water-based, compliant with US Environmental Protection Agency's AIM VOC regulations

BEAUTIFUL, LASTING PROTECTION

- Penetrates deeply for long-lasting protection on vertical or horizontal surfaces.
- Service life is estimated at more than 10 years.
- Treated surfaces “breathe” – does not trap moisture.
- Water-based formula minimizes explosion and fire hazards compared to solvent-based water repellents.
- Appropriate for use on manufactured stone surfaces.
- Resists water penetration when applied over existing shrinkage cracks of 0.02 inches or less.
- Easy cleanup with PROSOCO’s 2010 All Surface Cleaner.

Sullivan House Sober Living Facility

- Exterior brick protected with Siloxane PD in 2022.
- Former home of the Eagle Press in Claremont, NH. Complete gutting and renovation of a 2-story brick building built in 1930.
- R-Guard Cat 5 Air & Water Barrier installed as negative side air barrier. New windows and rough openings treated with R-Guard FastFlash and AirDam.
